## Conference Goals

The EuroMed Academy of Business annual conference is one of the major Business Management conferences of its kind in terms of size, quality of content, and standing reputation of attendees. Many of the papers presented contribute significantly to the business knowledge base.

Our goal is to create a friendly and approachable academy and environment, a strong network, whereby its members (including senior worldwide scholars, young faculty members, doctorate students, researchers, and business practitioners) are guiding and mentoring each other. Further, participants attend the conference's Research Project Workshop to meet, improve research, collaborate with others, and apply for EU project funding. Some of the conference distinctions are:

- a) Publication opportunities in highly ranked and indexed journals in Web of Science and Scopus
- b) ISBN Conference Book of Proceedings including an ISSN for the book series. Book of Proceeding has always been approved for inclusion in the Conference Proceedings Citation Index of Clarivate Analytics an integrated index within Web of Science

**Special Track Proposal** (*submit manuscripts in General Track 51*)

### **Replacing plastic in food packaging as sustainable innovation in the organic food sector**

Special track proposal by Luigi Cembalo ([cembalo@unina.it](mailto:cembalo@unina.it)), on behalf of BIODEGRAPACK research project (<https://biodegrapack.agecon.unina.it>)

Organic agriculture is a sustainable production system that has gained, in recent decades, massive implementation at global level (Migliorini & Wezel, 2017). Due to its role in reducing the environmental impact in agri-food supply chains, and thanks to its market appreciation, organic agriculture represents an ideal arena for experimenting the adoption of sustainable innovations. Among the numerous challenges, organic supply chain is called to face the limits of distribution technologies that are often responsible of food waste and plastic waste (Hemmerling et al., 2015). As for the plastic waste, a sustainable solution comes from the bioplastics. Bioplastic may face at least two main concerns, namely 1. Improving shelf-life of fresh products, and 2. Reducing the use of fossil-origin plastic. Current special issue proposal is meant to collect original papers tackling plastic waste issue in organic supply chains.
